# ☑ VOTER REGISTRY

The accuracy and integrity of a Voter Registry in any jurisdiction is a critical element to ensure all qualified constituents have the opportunity and right to vote. If you don't uniquely resolve the identity of a voter at registration your problems multiply downstream - we know - we've lived it.

THE IMT VOTER REGISTRY SOLUTION

A recent study by the PEW Charitable Trusts cites that approximately one in eight voter registrations in the U.S. are no longer valid or are significantly inaccurate and that 24 percent of the eligible population are unregistered. Another study undertaken by CalTech/MIT states that the cost of voter registration accounts for up to 33% of election related expenses. Our Voter Registry is built on proven IBM InfoSphere software and provides an innovative solution to address this issue:

360⁰ VOTER VIEW

Create a single, trusted, and authoritative voter record from department data sources such as DMV, UI, IRS, Vital Records etc.

The Voter Registry uses gold standard probablistic link & match algorithms built by IBM.

AGILE PROCESSES

Quickly deploy business processes to enhance services to voters and poll workers via Business Process Manager.

Consent to share data at DMV Registration

File an Objection

Verify in line voters

STRONG GOVERNANCE

Enforce governance, privacy, and service level agreements with real time indicators.

Greatly enhance data quality and integrity with data stewardship tools and reports.

Anonymize private data for external sharing.

INTEGRATION

A rich suite of interfaces allows fast and seemless integration with electronic voting systems and key external stakeholders:

ERIC for data sharing and notifications

GIS Systems (e.g. ESRI)

FRAUD RELATIONSHIPS

Discover patterns and unknown relationships to uncover potential voter fraud.

Non Eligible Voter

Multiple Registrations

Multiple Votes

False Identity Assertions

INNOVATIVE - AGILE - PROVEN - QUALITY

We choose our words carefully and we live by them. We are committed to researching and developing new innovative solutions. As a small company we are flexible - an agility you don't find with larger companies. We are proud of the investment in training, tools, and mentoring we make in our people every year and we bring strong references to show our solutions are proven and delivered with quality. But don't take our word for it - test us or speak to our clients.
